

UL GLOBALPLATFORM COMPLIANCE TEST SUITES

Who is it for?

UL GlobalPlatform Compliance Test Suites are the most thorough and complete set of approved test suites for card manufacturers, test labs and anyone that wants to test GlobalPlatform (GP) card implementations.

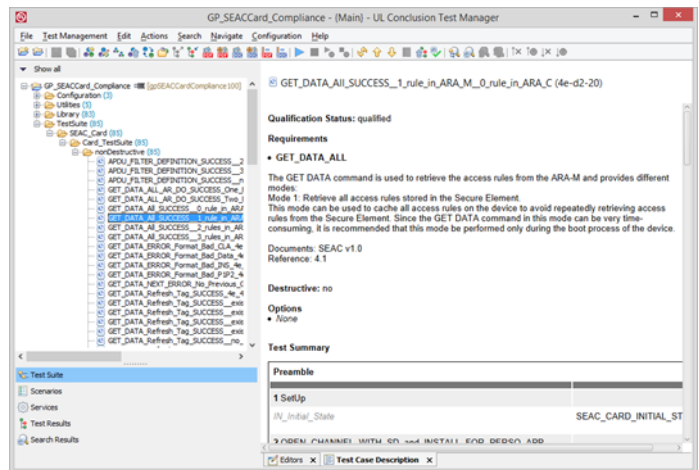

Why do you need it?

The UL GlobalPlatform Compliance Test Suites are the perfect tool for testing the GP implementation on a card and assist you in achieving qualification for your product. The test suites allow you to test the specific configuration of your product according to the test plans GlobalPlatform developed. Each test suite is based on a specific official test plan from GlobalPlatform.

All test suites have achieved qualified status under the GlobalPlatform Compliance Program and so are the perfect means to help you achieve qualification for your product.

What is inside?

GlobalPlatform have created a series of configurations that specify the features and restrictions of a card based on the needs of specific industries. UL GlobalPlatform Compliance Test Suites are built from the official GlobalPlatform Card Compliance Test Plans and cover all tests as mandated by GlobalPlatform.

Key benefits

- Test a UICC according to GlobalPlatform specifications
- Ensure high level of compliance and interoperability
- Flexible, portable, easy to set up
- Backed by expertise in mobile and compliance test tools
- Operating on top of UL Conclusion Test Manager
- Qualified by GlobalPlatform Compliance Program as GlobalPlatform Qualified Tool

UL GLOBALPLATFORM COMPLIANCE TEST SUITES

eSIM Test Suites

UL GlobalPlatform eUICC Consumer Compliance Test Suite

This test suite is based on GSMA's RSP Technical Specification and covers:

- Profile loading using SM-DP+ session and random keys
- Profile Management using LPA interface (enable, disable and delete profile)
- Profile metadata update
- Notification handling
- eUICC memory reset

UL GlobalPlatform eUICC M2M Compliance Test Suite

This test suite is based on GSMA's Remote Provisioning Architecture for Embedded UICC Test Specification and covers:

- ISD-P creation and key establishment using ECASD
- Profile download (using SCP81 HTTPS and SCP03t)
- Profile state management (enable, disable and deletion)
- Notification mechanism (SCP80 SMS and SCP81 HTTPS)

UL GlobalPlatform eUICC SIMalliance Profile Compliance Test Suite

This test suite is based on the SIMalliance eUICC Profile Package: Interoperable Format Technical Specification for M2M and/or Consumer RSP (Remote SIM Provisioning) and covers:

- Profile Loading of SIM file system with and without applications
- Profile Enabling of SIM file system with and without applications
- Content validation post Profile loading
- Full Profile Installation Process for M2M via SCP81 HTTPS / SCP03t
- Full Profile Installation Process for Consumer RSP via SCP03t
- Nominal and error test sequences for all functional eUICC testing

UL GLOBALPLATFORM COMPLIANCE TEST SUITES

Industry Configurations Test Suites

UL GlobalPlatform Financial Configuration Compliance Test Suite

This test suite is based on the official GlobalPlatform Card Financial Configuration test plan and covers:

- Support of 4 sub-configurations as defined in Financial Configuration specification
- Secure Messaging (SCP 02 option i = '55')
- Secure Messaging (SCP 03 option i = '10', '30' and '70')
- Key Management (Put Key and Store Data commands), includes DES, AES, RSA (1024 & 2048 bit) and ECC keys
- Logical Channel Management
- Data Store (storage and retrieval of DGI objects)
- Card Content Management (loading, installing, deleting etc. applications), includes AES, RSA (1024 & 2048 bit) and ECC algorithms
- Security Domain Tree (Deletion and Extradition with Security Domain hierarchy)
- Confidential Card Content Management (Security Domain personalization using Controlling Authority Security Domain (CASD))
- GlobalPlatform API (on card GlobalPlatform applet API)

UL GP Basic Financial Configuration Compliance Test Suite

This test suite is based on the official GlobalPlatform Basic Financial Configuration Test Plan and covers:

- Card Specification v2.1.1
- Card Content Management
- Application Data Store
- GlobalPlatform applet API
- Key Management
- Card and Application Lifecycle State Management
- Logical Channel Management
- Application hierarchies
- Secure messaging (SCP02)

UL GP CI Configuration Compliance Test Suite

This test suite is based on the official GlobalPlatform Common Implementation Configuration test plan and covers:

- Card Specification 2.2.1 and Amendment D v1.1 and E v1.0
- Card Specification 2.3 and Amendment D v1.1.1 and E v1.1
- Secure Messaging (SCP 02 option i = '55')
- Secure Messaging (SCP 03 option i = '10', '30' and '70')
- Life Cycle State Management (card and application life cycle)
- Key Management (Put Key and Store Data commands), includes DES, AES, RSA (1024 & 2048 bits) and ECC keys
- Logical Channel Management
- Data Store (storage and retrieval of DGI objects)
- Card Content Management (loading, installing, deleting etc. applications), includes DES, AES, RSA (1024 & 2048 bits) and ECC algorithms
- Security Domain Tree (Deletion and Extradition with Security Domain hierarchy)
- GlobalPlatform API (on card GlobalPlatform applet API)

UL GlobalPlatform Mapping Guidelines Compliance Test Suite

This test suite is based on the official GlobalPlatform Mapping Guidelines test plan and covers:

- Card Specification v2.2.1
- Card Content Management (authorized)
- Application Data Store
- GlobalPlatform applet API
- Key Management
- Card and Application Lifecycle State Management
- Logical Channel Management
- Secure messaging (SCP02)

Industry Configurations Test Suites (continue)

UL GlobalPlatform ID Configuration Compliance Test Suite

This test suite is based on the official GlobalPlatform ID Configuration test plan and covers:

- Card Specification v2.2.1 and Amendments D and E
- Secure Messaging (SCP 02 option i = '55')
- Secure Messaging (SCP 03 option i = '10', '30' & '70')
- Life Cycle State Management (card&application life cycle)
- Key Management (Put Key and Store Data commands), includes DES, AES, RSA (1024 & 2048 bits), ECC keys
- Data Store (storage and retrieval of DGI objects)
- Card Content Management (loading, installing, deleting etc. applications), includes DES, AES, RSA (1024 & 2048 bits) and ECC algorithms
- GlobalPlatform API (on card GlobalPlatform applet API)

UL GlobalPlatform SE Configuration Compliance Test Suite

This test suite is based on the official GlobalPlatform Secure Element test plan and covers:

- GlobalPlatform Card Specification v2.2.1 and Amendments A, D and E
- Secure Messaging (SCP 02 option i = '55'; SCP 03 option i = '10', '30' and '70')
- Life Cycle State Management
- Key Management, including DES, AES, RSA and ECC keys
- Data Store (storage and retrieval of DGI objects)
- Card Content Management, including DES, AES, RSA (1024 & 2048 bits) and ECC algorithms
- Confidential Card Content Management (CASD)
- Security Domain Tree (Security Domain hierarchy) GlobalPlatform API (on card GlobalPlatform applet API)

UL GlobalPlatform UICC Configuration Compliance Test Suite

This test suite is based on the official GlobalPlatform UICC Configuration Test Plan and covers:

- Card Specification v2.2.1 and Amendment A v1.0.1
- Card Specification v2.3 and Amendment A v1.1, Amendment B v1.1.3 and Amendment D v1.1.1
- Secure Messaging (SCP 02 option i = '55', SCP 03 option i = '10', '30' and '70', SCP 80 with SMS and CAT_TP bearers and SCP81 with TLS 1.0, 1.1 and 1.2 with all PSK cipher suites)
- Key Management (Put Key and Store Data commands), includes DES, AES, RSA (1024 & 2048 bit) and ECC keys
- Logical Channel Management
- Data Store (storage and retrieval of DGI objects)
- Card Content Management (loading, installing, deleting etc. applications), includes DES, AES, RSA (1024 & 2048 bit) and ECC algorithms
- Security Domain Tree (Deletion and Extradition with Security Domain hierarchy)
- Confidential Card Content Management (Security Domain personalization using Controlling Authority Security Domain (CASD))
- GlobalPlatform API (on card GlobalPlatform applet API)

UL GlobalPlatform Compact IoT Configuration Compliance Test Suite

This test suite is based on the Compact IoT Configuration specification and covers:

- Secure Messaging (SCP 02 option i = '55')
- Secure Messaging (SCP 03 option i = '10', '30' and '70')
- Key Management (Put Key and Store Data commands), includes DES, AES, RSA (1024 & 2048 bit) and ECC keys
- Logical Channel Management
- Data Store (storage and retrieval of DGI objects)
- Card Content Management (loading, installing, deleting etc. applications), includes AES, RSA (1024 & 2048 bit) and ECC algorithms
- Security Domain Tree (Deletion and Extradition with Security Domain hierarchy)
- GlobalPlatform API (on card GlobalPlatform applet API)

UL GLOBALPLATFORM COMPLIANCE TEST SUITES

Industry Extension Test Suites

UL GlobalPlatform SCP11 Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform test plan and covers:

- Secure Channel Protocol 11a
- Secure Channel Protocol 11b

UL GlobalPlatform ELF Upgrade Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform Test Plan and covers:

- Upgrade single and multiple ELF
- Management of ELF Upgrade life cycle states
- Recovery after aborted ELF Upgrade operation
- ELF Upgrade dependency on ELF version number

UL GlobalPlatform Contactless Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform Contactless Extension test plan and covers:

- Card Specification v2.3 and Amendment C v1.2
- Installation and deletion of Contactless Applications (Type A, B and F)
- Contactless communication protocol parameter management (combination and conflict detection of Type A, B and F parameters)
- Management of priority selection of Contactless Applications
- Contactless Application group management
- Contactless Application activation status management
- Communication interface restriction

UL GlobalPlatform Memory Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform Contactless Extension test plan (Cumulative Granted Memory and Cumulative Delete) and covers:

- Card Specification v2.3 and Amendment C v1.2
- Cumulative Delete
- Cumulative Granted Memory

UL GlobalPlatform SE Contactless Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform SE Contactless Extension test plan and covers:

- GlobalPlatform Card Specification Amendment C 1.0.1
- Installation and deletion of Contactless Applications
- Contactless communication protocol parameter management
- Management of priority selection of Contactless Applications
- Contactless Application group management
- Contactless Application activation status management
- Communication interface restriction

UL GlobalPlatform SE Memory Management Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform SE Memory Management Extension test plan and covers:

- Card Specification Amendment C v1.0.1
- Cumulative Delete
- Cumulative Granted Memory

Industry Extension Test Suites (continue)

UL GlobalPlatform UICC Contactless Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform Contactless Extension test plan and covers:

- Card Specification v2.2.1 Amendment C
- Contactless application installation
- Contactless application selection priority
- Contactless application group management
- Contactless application activation status
- Contactless application interface restriction
- Contactless protocol parameter computation and conflict detection

UL GlobalPlatform UICC Memory Management Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform UICC Memory Management Extension test plan and covers:

- Card Specification v2.2.1 Amendment C
- Cumulative Delete
- Cumulative Granted Memory

UL GlobalPlatform UICC SCP81 Extension Compliance Test Suite

This test suite is based on the official GlobalPlatform UICC SCP81 Extension and covers:

- Card Specification 2.2.1 Amendment B
- Secure Messaging (SCP81 with TLS 1.0, 1.1 and 1.2 with all PSK cipher suites)
- Key Management (Put Key and Store Data of SCP81 AES and DES keys)
- Card Content Management (installation of Supplementary Security Domain with SCP81 parameters)

UL GLOBALPLATFORM COMPLIANCE TEST SUITES

Other Technology Test Suites

UL GlobalPlatform SE Access Control Card Compliance Test Suite

This test suite is based on the official GlobalPlatform SE Access Control Card test plan and covers:

- GlobalPlatform Secure Element Access Control v1.0
- Retrieval of rules from ARA-M applet using the device interface and the GET DATA command
- Storage, update and deletion of rules in the ARA-M applet using the remote interface (SCP02, SCP03, SCP80 and SCP81) and the STORE DATA command

UL GlobalPlatform HCI UICC Compliance Test Suite

This test suite implements the test specification ETSI TS 102 695-2 for HCI UICC and covers:

- HCI architecture
- HCP
- Instructions
- GATES
- HCI procedures
- Contactless card emulation

UL GlobalPlatform SWP UICC Compliance Test Suite

This test suite implements the test specification ETSI TS 102 694-2 for SWP UICC and covers:

- System architecture tests
- Physical characteristics tests
- Electrical characteristics tests
- Physical transmission layer tests
- Data link layer tests
- SHDLC LLC definition tests
- CLT LLC definition tests

Hardware

- UL Contact and Contactless Card Reader
- Micropross MP65
- Micropross MP300 TC3

UL Conclusion Test Manager

UL GlobalPlatform Compliance Test Suites run on UL Conclusion Test Manager (CTM). CTM is a user-friendly test management application consisting of a test engine with the ability to create and send messages in many variations via (several) interfaces to the system under test. A cutting-edge test management system to manage the test process providing flexibility in configuring the test execution and reporting results.
